

CONFIDENTIAL

REASONS FOR PROPOSED MOVE OF DCI OFFICE
TO SOUTH BUILDING

1. Better protection for DCI and staff

- (a) Within last month at least four persons have entered present building who were definitely psychotic -- (one of whom had a gun).
- (b) We are being faced with more "cranks" as shown in "crank mail" and various security cases.

2. Totally inadequate space for reception of both outside visitors and employees.

- (a) Example: Waiting in the one reception room or just outside in the hall on one day in January:

- 25X1X7 (1) One [REDACTED]
- (2) One [REDACTED]
- (3) One ex-staff Agent of CIA
- (4) One possible psychotic
- 25X1A (5) Two Chiefs of Foreign Divisions
- (6) A Chief of a [REDACTED]

3. No space to install and properly conceal such physical security devices as:

- (a) Electronic metal detector (pistols - monkey wrenches)
- (b) Camera surveillance when needed.
- (c) Other electronic coverage as needed.
- (d) Alarm devices, etc.

4. New building will provide variety of private exits and entrances for "quiet" entry and departure of sensitive persons, VIP's, etc. -- and in emergency for our own senior officials.

5. New building will permit at least one "alternate office" for DCI to use.

on certain occasions or to make available to a VIP or a Senior Representative during a short visit.

6. New building will permit "vetting" of visitors in several reception waiting rooms and apart from regular employees who may be waiting to see DCI.
7. New building allows further separation of components of headquarters and yet retain compactness -- and all parts thereof on one floor.
